AFTES 2021 Congress Paris

Dr. Angus Maxwell, CEO and Founder of Maxwell GeoSystems will be attending the AFTES 2021 event in Paris, from the 6 - 8 of September 2021.

The theme of the event is “The underground, a space of innovation”, which offers vast opportunities on the urban planning level, design of studies, along with great strides that are being continuously made in boring and construction plant, equipment and products. With digitalisation fuelling the explosion in the ConTech (Construction Technology) sector, Maxwell GeoSystems identifies this as a key element in the growth and development of new technologies, evident through the MissionOS platform, which is implemented in various projects around the world.

For those interesting in knowing more about Maxwell GeoSystems, our bespoke MissionOS platform, or to simply have a chat, be sure to look out for Dr. Angus at the event!
