### ITA Tunnelling Awards 2021 Appreciation

The 7th edition of the ITA Tunnelling Awards 2021 ceremony took place last week. The virtual event saw hundreds of people tuning-in from around the world.

Maxwell GeoSystems was delighted to have been shortlisted as one of the finalists in the “Technical Innovation of the Year” award. We would like to congratulate all the other finalists and in particular WeBuild on their Vertical pipe-jack alternative to implementing marine risers which ultimately won the competition. Whilst we weren’t successful, being one of the finalists still remains a great achievement for our whole team, especially in Singapore and a strong motivator to continue delivering the best solutions for our clients.

Interestingly, 2 out of the 3 category winners of the ITA Tunnelling Awards actually use MissionOS, the bespoke construction management platform of Maxwell GeoSystems, a reassuring endorsement of the utilisation and application of the platform. To find out more about MissionOS, visit:
