### “Tunnelling Specialist Supplier of the Year” Winners

Maxwell GeoSystems won “Tunnelling Specialist Supplier of the Year” award for the implementation of STEMS in DTSS2 project in Singapore at the NCE Tunnelling Festival Award Ceremony 2021!

The Deep Tunnel Sewerage System (DTSS) is a superhighway for Singapore’s used water management. Maxwell GeoSystems helped to successfully commission the Shaft and Tunnel Excavation Monitoring System (STEMS) in the project.

The award ceremony took place in London, UK, with Dr. Angus Maxwell (centre-right), founder and CEO in attendance, together with Dennis Bishop (centre-left), senior board advisor. Hosted by UK’s New Civil Engineer publication, the award ceremony recognised the contributions made by individuals and organisations across the tunnelling industry globally.

On winning the award, Dr. Angus Maxwell said “The determination of our project management team in Singapore and the responsiveness of the technical team in Cochin really made this work. I’d like to thank the 900+ users for their collaboration and the Public Utilities Board and their engineer BVAecom for their support”
